This collection of information is required by 37 CFR 1.5. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to 2 hours to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

STATEMENT OF THE SUBSTANCE OF AN INTERVIEW

Sir:

Applicants thank the Examiner for the courtesies extended during a telephonic interview conducted 26 October 2004, in the above-captioned application. During that interview, we discussed claim 15. The Examiner inquired if a deposit statement had been made or could be made with respect to that claim. In response, I agreed to send by facsimile a Declaration concerning the deposit requirement that was already submitted in parent applications to this case. Further, authorization was given to amend claim 15 as shown below, and to insert a paragraph stating priority as also shown below. Please note that these amendments do not constitute new amendments and are included only to reflect the amendments approved and made by the Examiner.

1. (15) A method of making lysine by fermentation, comprising culturing a strain of *Corynebacterium glutamicum* in a culture medium, said strain including a nucleic acid molecule encoding pyruvate carboxylase, said nucleic acid molecule comprising a polynucleotide having a nucleotide sequence at least 95% identical to a sequence selected from the group consisting of:

- (a) a nucleotide sequence encoding the pyruvate carboxylase polypeptide having the amino acid sequence ~~in~~ of SEQ ID NO: 2;
- (b) a nucleotide sequence encoding the pyruvate carboxylase polypeptide having the complete amino acid sequence encoded by the clone contained in ATCC Deposit No. PTA-982; and
- (c) a nucleotide sequence complementary to any of the nucleotide sequences in (a) or (b),

wherein said pyruvate carboxylase is expressed 2 to 20 fold higher in said strain than in wild-type *Corynebacterium glutamicum*;

producing lysine, and recovering said lysine.

On page 1, underneath "**Pyruvate Carboxylase from *Corynebacterium glutamicum***" insert --- This application is a Divisional of U.S. Application No. 09/677,575, filed 10/03/2000 now U.S. Patent No. 6,403,351, issued 6/11/2002, which is a Divisional of U.S. Application No. 09/220,081 filed 12/23/1998, now U.S. Patent No. 6,171,833, issued 1/09/2001-
--.

It is believed that no extension is necessary to make this interview summary timely. If one is necessary, please grant it and deduct the fee for same from deposit account no. 02-4553.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Duane A. Stewart III", with a long horizontal flourish extending to the right.
